**Subject:** EPA Comments on Sediment Core FSP  
**Date:** 08/13/2007 08:34 AM

---

On Friday there were a number of emails regarding the sediment core locations transmitted along with EPA's comments. A couple of things:

1 ) As Ben indicated in his email, I am the primary point of contact on the locations. If there is a question about a location, please contact me. However, if you have questions about the GIS layer or any other GIS related comments, Ben is probably the one who can best answer your questions. Note too that we did include a spreadsheet with xy coordinates with the comments.

2) At Thursday's managers meeting, we set aside September 13, 2007 for an all day meeting to discuss locations. This will likely result in the consolidation and relocation of a number of sample locations. Sample locations will then be ground truthed during a site recon to take place prior to initiation of the sediment sampling effort.

If you have any questions, please do not hesitate to contact me.

Thanks, Eric
